

GREEN EVENTS

Certified Sustainable Events

Sustainable Event Management System based on ISO 20121

ISO/IEC 20121:2012

We organize events through a system that provides sustainability criteria throughout the necessary life cycle, improving the different stages and activities such as design, planning, implementation, implementation, review and post-event activities. This is our principle for sustainable development.

The Sustainable Event Management System has been audited and certified by SGS Chile S.A., becoming the **first certification** of its kind in Chile.

Purpose and Values

Sustainable Event Management System based on [ISO 20121](#)

Statement of Purpose: we are an organization oriented to the planning and production of sustainable events, which generate value to the stakeholders, promoting innovation, inclusiveness, integrity and transparency.

Statement of Values: our values applied in each event that we organize, are to act with professionalism, honesty and moral integrity, in the relationship with respect to the interested parties. Prioritize teamwork by encouraging the participation of all to achieve a common goal, sharing information and knowledge. Promote the flexibility and mental attitude necessary to adapt to continuous improvement. Ensure the responsible behavior of the organization in social, economic and environmental issues based on ISO / IEC 20.121 (Sustainable Events Management System), with a clear commitment to sustainable development and adapting our strategies to the preservation of the environment.

Sustainability Policy

Green Events Policy

As an organization we are concerned with the realization of an event that considers all aspects of sustainability, considering the technological environment in which it is developed and its value chain.

We must consider minimally the characteristics of inclusiveness with all participants, integrity in the content we deliver, as well as a proper and transparent management, which allows us to continuously improve, leaving a legacy.

We encourage and reinforce the use of sustainable practices with all stakeholders, committing ourselves to all applicable legislation and regulations, for the efficient use of resources.

We seek as an organizational objective, the efficient use of the technologies of the event, as one of the main characteristics of sustainability.
